

581F-B

ADEK 581F-B 4U Chassis

Features

The ADEK 581F positions all slots at the front of the unit. That's ideal for applications requiring frequent access to add-on board ports. Six USB ports are located right on the front of the chassis providing unobstructed and convenient access. It also opens up all 14-slots for other uses. The 581F provides room for up to 14 FULL LENGTH boards. ADEK offers PICMG backplanes in a variety of PCI, ISA and other slots as well as single board computers. The control panel area includes cutouts for two DB-9 pin serial ports and one DB-25 parallel port. Audio ports, power-on and hard drive activity lights and switches are also located on the front panel as well as the 5.25" bay.

Features and Specifications:

- 19" industrial rack mount 4U case design
- All steel and aluminum construction
- Accepts up to 14-slot PICMG backplanes
