within 24 hours

5 Reasons to choose ADEK computers

1 Systems Built YOUR Way.

That's our tag line and it describes our system building philosophy. Only after we discuss your application with you can we recommend a system that's best suited to meet your needs. This assures you get the best computer for your application.

2 We're Sized Right.

ADEK is large enough to meet all your needs, yet small enough to provide a high level of personal support. The attention you receive is one benefit that separates us from the competition.

3 We're Priced Right.

Since we custom build every computer, you pay for only the system you need to get the job done. We are happy to discuss your requirements and provide a quote. No obligation, of course.

4 On Time. Always.

Ask our regular customers; we meet delivery requirements time-after-time. In fact, several of our customers issue report cards measuring vendor performance. ADEK consistently receives excellent grades for product quality and on-time delivery.

5 We Know Our Business.

Our team of engineers is well-versed in the latest technology, yet they've been around long enough to suggest older technology to handle older applications.

"...all systems GO!"
