AD-MID

Mid-Tower Computer

Features

Our long life mid-tower computers are custom built in any configuration! Multiple ISA and PCI slot configurations are available.

ADEK has years of experience as an OEM system builder and we look forward to building systems to meet your needs. Our OEM customers appreciate the custom configurations we can offer. We can build systems incorporating the latest technology or systems designed to handle legacy boards such as those requiring PCI or ISA slots.

Our long life mid-tower computers are custom built in any configuration! Multiple ISA and PCI slot configurations are available.

ADEK has years of experience as an OEM system builder and we look forward to building systems to meet your needs. Our OEM customers appreciate the custom configurations we can offer. We can build systems incorporating the latest technology or systems designed to handle legacy boards such as those requiring PCI or ISA slots.

Many of our customers require standard mid-tower and desktop computers that offer PCI or ISA slots to accommodate their legacy boards. You'll be happy to know ADEK is your source for a variety of commercial grade computers that offer PCI or ISA.

Some of our largest OEM customers rely on us to build their industrial grade computers to their exact

specifications. We offer private labeling and packaging.
